

Galaxy SURGE

WHITEPAPER

INTRODUCTION

The evolution of blockchain and distributed ledger technology in the last decade has not only created the appreciation of a transparent, immutable, and secured way of managing transactions and information, it has also enabled innovation driven by decentralised smart contracts.

With expected and continued development in this space, these innovations and solutions are expected to continue to drive, individuals, financial businesses, government departments and other organisations who are exploring efficiency, transparency, and profitability into the blockchain and cryptocurrency space.

With the continued growth of the blockchain and cryptocurrency space, the Decentralised finance space offers great opportunities for investment and decentralised finance products and finance management opportunities. 'The Decentralized finance, also known as DeFi, is a fast-growing sector of the cryptocurrency industry. While cryptocurrency coins create a decentralized store of value separate from any government-backed fiat currency, DeFi creates decentralized financial instruments separate from traditional centralized institutions'- CityAM.

Although still at its infancy when compared to the global economy, DeFi has seen rapid growth in 2020. In early 2019, there was only \$275M of crypto collateral locked in the DeFi economy. By February 2020, that number had grown to over \$1B, and it has continued to grow impressively throughout the year, hitting \$18bn as at Dec 2020.

The Defi space has seen a major growth in 2021 with decentralised financial products as well as decentralised derivatives where value is driven by expected market demand and supply. A huge number of projects have evolved as 'meme projects' leveraging and replicating the success of other projects and spreading the growth in value across the crypto space.

Galaxy Surge aims to provide a combination of these two categories to enable a sustainable value growth in the Defi space.

The Galaxy Surge Token

Galaxy Surge (\$GALS) is a community-based token that aims to reward the \$GALS token holders via a decentralised smart contract distribution of 5% of all Buys & Sell transaction in BUSD. The roadmap will see Galaxy Surge implement a DAO decision structure for investing in other blockchain and crypto projects once the marketing threshold balance is exceeded. The \$GALS token is built on the Binance Smart Chain (BEP20 Token Standard).

Features

Automated Liquidity Pool

In the early years of crypto liquidity pools had been generally driven by users or contracted market makers, whilst this helped in maintaining the growth of the cryptocurrency space, the centralised nature of agreeing terms of the pools meant it was not 100% transparent. The Defi space has over the last few years provide an effective alternative to this. Whilst not without it challenges the ability to now provide automated liquidity to exchanges via the smart contract linked to the tokens transactional activities not only ensures a fair and stable price regime but it also eliminates the centralised nature of how liquidity was previously managed. The GALS token (see token economics) will provide a stable addition to the exchange liquidity pool, this would ensure that irrespective of the market activity the pool will be sufficiently enhanced to support the required stability.

5% Fee Distribution in BUSD Rewards for Token Holders

In order to drive value GALS token holders are encouraged to 'hold', as a result holders of the GALS token get BUSD in reflections. For every buy and sell transactions 5% will be distributed directly to the wallets holding GALS.

\$GALS 'DAO' Investment Decision

As part of the transaction fees for buys and sell, 3% of all buys and sells will be dedicated to a marketing and operations pool, this is to enable the Galaxy Surge team to continue to evolve, promote and develop the GALS token and its utility. We however expect that the project will grow to a stage where the marketing pool funds will be in excess of what is required. As a result, the Galaxy Surge team will place an operational pool balance limit for marketing and operations. A snapshot will be taken on the last day of the quarter to capture the outstanding balance in the marketing and operations pool address. Where the balance exceeds 1000BNB the excess will be moved to an investment wallet where the community through a decentralised voting system will determine which crypto projects the excess funds can be invested in. 85% of the tokens received from the investments will be airdropped to the wallets of the top 500 GALS token holders.

Buy Back

A buy back strategy is also embedded within the GALS token structure, this deflationary attribute allows the project buy back the GALS token from the exchange. 1% of every buy and sell is transferred to a dedicated buy back address in BNB. The BNB is then used to buy back token, the buy-back funds will also serve as a tool to enable the stability of the GALS token during volatile periods.

Token Economics

Galaxy Surge has a total of 1,000,000,000,000,000 tokens. 45% of the tokens will be allocated to presale and initial exchange liquidity. 15% of the tokens will be allocated to the team, 5% of the tokens will be allocated to strategic advisors and 20% of the tokens will be retained for the ecosystem, this would be allocated towards evolving the utility of the GALS product (staking, new product features etc) as well as project operations. 90% of the team tokens and 100% of the Ecosystem tokens will be vested over 20 months with 5% of the vested tokens released monthly. 15% of the GALS Token will be Burnt post project launch.

- Presale and Initial Exchange Liquidity – 45% (exchange liquidity locked)
- Team Tokens – 15% (90% vested for 20 months)
- Advisor tokens – 5% (90% vested for 20 months)
- Ecosystem – 20% (100% vested over 20 months)
- Token Burn – 15% (Token Burnt at launch)

Token Burn – 15% (Token Burnt at launch)

Ecosystem – 20% (100% vested over 20 months)

Advisor tokens – 5% (90% vested for 20 months)

Presale and Initial Exchange Liquidity – 45% (exchange liquidity locked)

Team Tokens – 15% (90% vested for 20 months)

Galaxy Surge Road Map

PHASE 01

- Project analysis and research – Sept 2021
- Contract development testing and review – Nov 2021
- Contract Audit – Dec 2021
- Promotion and Creating Social Media Branding – Nov/Dec 2021
- Public Presale – Dec 2021
- Token Burn – Dec 2021
- Listing on Pancake Swap
- Listing on CMC, Coin Gecko, etc – January 2022

PHASE 02

- Marketing & Growth of Galaxy Surge Q1 2022
- Listing on CEX Exchange Q1/Q2 2022
- Buy-Back Implementation – Q1 2022
- Partnership - Q1 / Q2 2022
- Developing the GALS DAO
- Investment framework Q2 2022
- Partnership - Q1 / Q2 2022

PHASE 03

- Driving the growth of Galaxy Surge beyond 2022
- Developing additional features for the GALS token (Lending Solution, Exchange, GalaxySurge Market) – TBC
